TCC 1600

TOTAL CALENDER CONTROL SYSTEMS

The **FACTS** Total Calender Control (TCC) is designed specifically for optimized calender gauge control.

FACTS can coordinate and control the complete calender line.

Full Line Control

Gauge Control	Temperatures
Feed Mills	Tensions
Extruder Systems	Let-offs
Calender speeds & ratios	Windups
Line speeds & ratios	

System Capabilities

Electric Screw Actuators	Hydraulic Actuators
Roll Bending/Straightening	Cross-Axis
Hydraulic Cushion	Servo Position Control
Speed Compensation	Roll Prepositioning
Motorized Valves	Servo Position Control
Roll Temperature Control	Mill Knife Position
Extruder Speed & Temperature	Speed & Tension Control

System Highlights & Benefits

Precision Control	Material Savings
Easy to Use	Increased Productivity
Low Cost of Ownership	Reduced Scrap
Adaptable	Reduced Maintenance Costs
Expandable	Reduced Labor
Proven Performance	Improved Quality

On-Cal 3 Thickness Gauge

A non-nuclear, precision gauge for the measurement of calendered materials, such as rubber, vinyl and other non-metallic polymers.

SME Gauge for Calendered Web Thickness Profile

The **FACTS** SME Gauge is THE non-nuclear solution for calendered web thickness measurement. The SME single side scanner provides a rugged, high speed scanning platform and is designed for precise and repeatable performance with an extended life of operation, even in harsh environments.

TCC 1600

TOTAL CALENDER CONTROL SYSTEM

Total Calender Line Control

Only FACTS integrates both control and management of your manufacturing process, equipment and job histories to provide you optimum production efficiency.

The FACTS TCC1600 is designed specifically for optimized calender gauge control thru the use of "On-Calender" fixed gauges and/or post calender sheet scanners. The FACTS "On-Calender" sensors enable the TCC 1600 to provide precise machine direction and cross direction control of the calender process.

The system incorporates a high-resolution 19" LCD flat panel color touchscreen for operator command input plus data and graphics display. The TCC 1600 is operator-configurable, requires no computer skills and comes as a completely configured software system for your specific line.

On-Calender Gauge Advantages

- Short Transport Lag
- Continuous Measurement of Product in All Measurement Zones
- High Accuracy
- Stable Low Drift Design

Additional Control Features

- Real Time Trend Plotting
- Product Recipe System
- Security Code System
- Cascade/Strategy Loop Control (configurable)
- PID Loop Control (configurable)
- Transaction & Alarm Logging (with optional 3001 Host)

Options & Other Products

- Statistically Optimized Target Control
- Actuator Upgrades
- Width Measurement
- Servo Trim Knives
- Roll Surface Temperature Control
- Total Line Control
- Low Profile Traversing Bubble Piercer
- Vision Based Cord Spacing Measurement
- Balance Measurement

Scanning SME Gauge Advantages

- Post calender true thickness measurement
- Non-nuclear based measurement
- Excellent choice when on-calender measurement is not practical
- Cost effective and easy to maintain

FACTS, Inc. is the leader in calender gauge control, as well as overall process line control solutions. **FACTS** has provided systems worldwide to world class manufacturers in the tire and rubber, conveyor belting, power transmission, and hose industries.

FACTS, Inc. routinely provides new and existing process lines with complete electronic control systems and integrated HMI. Controls provided include, but are not limited to: temperature, speed and pressure control; sequence control; drive and heater systems; profile measurement and control.

FACTS, Inc. offers you experience at your fingertips with 24/7 support via Internet or modem.

FACTS, Inc. provides the tools to control your bottom line. Contact us today.
